## FOR IMMEDIATE RELEASE

### **Responsive Respiratory Launches New *O2 To Go! Cylinder Duration Online Calculator***

St. Louis, Missouri –January 5, 2012 – Responsive Respiratory expands free technology offering with the *O2 To Go! Cylinder Duration Online Calculator*.

Responsive Respiratory, a leader in high pressure oxygen solutions, announced the launch of a free online calculator - *O2 To Go! Cylinder Duration Web Calculator*, an innovative website that provides Technicians, Therapists, Providers and Patients with a versatile tool to address the biggest concern in oxygen use: the amount of oxygen available to ambulatory patients. The *O2 To Go!* calculator is available at no charge on Responsive Respiratory's new website: [www.respondo2.com](http://www.respondo2.com)

The *O2 To Go! Cylinder Duration Calculator* allows users to quickly estimate the duration of available oxygen in hours and minutes by selecting from pre-programmed cylinder, device and flow range parameters. "The Cylinder Duration Web Calculator simplifies oxygen use and set-ups for technicians, therapists and patients," comments Tom Bannon, RRI President. "The user-friendly inputs ensure quick and accurate results."

The *O2 To Go! Online Calculator* is the second oxygen estimator offered by Responsive Respiratory. The company launched its premier *O2 To Go!* mobile app for iPhone and Android devices in mid-2011. "The *O2 To Go!* website is a natural extension of our popular mobile app," notes Bannon. "The online calculator broadens the availability of this handy tool to those that do not have access to smart phone technology, but have an internet account."

About Responsive Respiratory - - Responsive Respiratory was founded in 2002 and is dedicated to providing high quality respiratory products for the home health care and hospital markets.
