FOR IMMEDIATE RELEASE

Responsive Respiratory Expands Offering of Home Filling Cylinders

St. Louis, Missouri –April 15, 2016 – RRI adds exclusive M6 and E cylinder sizes to their selection of home filling cylinders.

Responsive Respiratory’s line of home filling cylinders, valves and cylinder cases offers providers genuine home filling solutions for a fraction of the cost. The expanded line of home filling cylinders, featuring exclusive M6 and E cylinder sizes, integrates with a major home care manufacturer’s home filling system, allowing providers a choice in obtaining cylinders and accessories to fill patient needs.

“We know Providers are feeling the pain of reduced reimbursements and are looking at every avenue available to reduce costs and streamline their business, while continuing to service the needs of their patients,” notes Tom Bannon, Responsive Respiratory President. “The expansion into M6 and E home filling cylinders was driven by customer need – the need to adapt existing equipment to meet the changing service and ambulatory requirements of their patients.”

Industry response to RRI’s expansion of its home filling line has been positive. The home filling cylinders and cases complement Responsive Respiratory’s full line of oxygen delivery, transport and storage solutions and are stocked in their central US warehouse for same-day shipment.

About Responsive Respiratory - - Responsive Respiratory was founded in 2002 and is dedicated to providing high quality respiratory products for the home health care and hospital markets. RRI’s full line of professional respiratory products includes: oxygen conservers, regulators, cylinder carts & racks and carry cases.
