FOR IMMEDIATE RELEASE

Responsive Respiratory Updates Popular Tote 'N Go™ Cylinder Carrier

St. Louis, Missouri – January 13, 2017 – Responsive Respiratory introduces its newly re-engineered heavy-duty cardboard cylinder totes.

The Tote 'N Go™ carriers are an economical way to transport cylinders from the warehouse to the patient's home. The heavy-duty, moisture-resistant cardboard totes were re-engineered for greater durability and simplified set-up. RRI President Tom Bannon explains, "Our number one priority is to provide exceptional products and service to our customers. The re-engineering of the Tote 'N Go™ carrier evolved through the partnership of our customer advisory panel, identifying areas to enhance the overall experience and longevity of the product." He further notes, "The updated totes feature strategically positioned side and center panels for increased stability and a simplified pop-open, lock into place design for quick set-up."

RRI offers the Tote 'N Go™ cardboard cylinder carrier in three sizes to accommodate all delivery and transportation needs: M6 tote (6 cylinder capacity), M9/D tote (4 cylinder capacity), and D/E tote (4 cylinder capacity).

The heavy-duty cardboard carriers complement Responsive Respiratory's full line of oxygen delivery, storage, and transport solutions. All products are stocked and ready for immediate shipment from the central US warehouse.

About Responsive Respiratory: Responsive Respiratory was founded in 2002 and is dedicated to providing high quality respiratory products for the home health care, medical, EMS and industrial markets. RRI's comprehensive line of high pressure oxygen products include: oxygen conservers, regulators, cylinder carts & racks and carry cases.
